

Momentum Digital Snake System

As “Ears”, a Personal Monitor System

The Momentum Digital Mix Engine is “Ears” the way they should work, and the way they should sound! The 24 channel DSP uses 16 inputs from the network or simply two mi8 input boxes to deliver 8 mono or 4 stereo mixes to the outputs of the mo8me (mix engine). Control each mix with the mrc, nicknamed the “Tweak”, the wireless remote control for the mix engine.
